

AMP BOX DS2 MONO

Mono power amplifier

MSRP 499 € (incl. VAT)

Incl. wood side panels MSRP 559 € (incl. VAT)

- Audiophile PWM circuit (Pulse Wave Modulation)
- Very low distortion at very impressive bandwidth
- High efficiency from mains to audio power
- Multi layered PCB for short signal paths
- Line level input (RCA)
- Loop output (RCA)
- Isolated speaker outputs
- Trigger input & loop out
- Elegant aluminium - metal sandwich casing
- Available in black or silver with optional matt wooden side panels in eucalyptus, rosewood, walnut

colour options:

real wood side panels:

Output power: 120W / 205W @ 8 / 4 ohm

Frequency response: 10Hz - 50kHz (0dB, - 3dB)

Channel separation: >40dB @ 20kHz

Noise floor: >90dB

THD: < 0.1% @ 90W

Gain: 31dB

Line level input: 1x RCA

Loop output: 1x RCA

Input sensitivity: 550mV (100W, 4 ohm)

Input impedance: 100kOhm

Speaker out: 4mm Ø bananas, spades or bare wire

Trigger: 12V switching voltage

Trigger in and out: 2-pole coaxial jack Ø 2,5mm

External power supply: 48V/2,5A DC; 100 - 240V, 50/60Hz

Dimensions W x D x H: 206 x 68 x 194 alu finish

240 x 69 x 194 wood finish

Weight: 1450g (alu); 1900g (wood)

Excellent sound quality combined with compact dimensions and high energy efficiency

The heart of this audiophile amplifier is a Class D module which is highly efficient and energy saving. It delivers high output power, to drive demanding speakers and fill any room with pure sound, very low and frequency-independent THD to produce the cleanest sound possible. The top grade power amplifier module guarantees fully load-independent frequency response, low output impedance and very low noise floor. It meets our highest sonic standards in terms of spaciousness and fine dynamics and provides sufficient power for excellent reproduction in normal living rooms. As a sonic guideline for Pro-Ject amplifiers the homogeneous liquid sound of audiophile tube amplifiers are used as benchmark. All our next generation devices offer the possibility to come with wooden side panels. The side panels give the products a very classy and unique look. Three different finishes (rosenut, walnut and eucalyptus) are available to meet any taste and to match your furniture. A four layered PCB enables us to

use shorter signal paths, which are also responsible for the improved sound compared to its predecessor. Amp Box DS2 Mono will fill your home with the lush, energetic and smooth sound, usually found in much more expensive products. As additional upgrade you can use our Power Box DS Amp to improve the soundquality even further. The casing, made of aluminum and metal, is both elegant and solid, to protect against vibration and deliver highest aesthetics. The unmatched sound and the no compromise components make it an audiophile high end bargain!
