Dimensions: 72 x 206 x 200 (240) mm (HxWxD) without antenna

Weight: 3,25 kg

Stream Box RS is Pro-Ject Audio's reference-class audio streamer, that goes far beyond the AWARD WINNING audiophile grade highend audio streaming client Stream Box DSnet, Ready for use with streaming service Spotify, it will support HD audio music platform Tidal soon. Other streaming services like Deezer, Grooveshark etc, can be implemented using 3rd party applications. Additional to the streaming functionality, Stream Box RS also acts as D/A converter for other

digital sources, that use USB, coax and optical connection and as highend pre-amplifier with 1 additional analogue sound source! The audio circuitry is using E88CC tubes for ultimate fidelity and components, that guarantee extremely low noise and distortion levels. Volume control is done by a motor-driven ultra high end ALPS potentiometer via IR remote and/or the new and advanced Android or iOS Apps.
