MMX 130 wireless

Gaming Headset

DESCRIPTION

The MMX 130 wireless is perfect for social gaming, voice chats, streaming and music.

The open-back design provides a natural and spacious listening experience. Playing environments feel larger, soundtracks have greater impact, and subtle ambient sounds become a natural part of the atmosphere. At the same time, the user remains connected to the real-world surroundings. Conversations, the doorbell and other everyday sounds remain audible, making the MMX 130 wireless ideal for gaming at home.

The sound can be customised via the beyerdynamic app. There are also numerous EQ presets available for different game genres. Software updates are also available via the app.

The detachable META VOICE microphone ensures a clear sound. Without the microphone, the MMX 130 wireless can be used for listening to music.

The supplied USB-C cable can be used as audio or charging cable. Another analogue cable is used as audio cable.

The total battery runtime is more than 80 hours.

The supplied low-latency dongle connects via USB-C to a PC or other USB device to keep latency to a minimum whilst gaming. There is no input lag between audio and video, ensuring an outstanding gaming experience.

In Bluetooth® mode, the MMX 130 wireless can be paired with a smartphone or other Bluetooth®-enabled device, allowing you to enjoy the perfect connection for musical enjoyment, both at home and on the move.
